## DETAILED ACTION

### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Bea Koempel-Thomas 58213 on 10/20/2009.
3. The application has been amended as follows:

#### Specification Amendment

Please substitute paragraph [0080] with the following:

**[0080]** A computer-readable medium may include, without limitation, both volatile and nonvolatile memory, mass storage devices, and removable and non-removable media, ~~and~~ modulated data signals. The term "modulated data signal" refers to a signal that has one or more of its characteristics set or changed in such a manner as to encode information in the signal.

#### Claim Amendment

17. **(Currently Amended)** A computer-readable medium ~~including~~ having computer-executable instructions for performing operations in a component object-based multimedia

framework encoded thereon, the computer-executable instructions, upon execution configuring a processing unit to perform the operations comprising:

receiving a uniform resource locator (URL) specifying a location of media content as associated with one of a plurality of applications requesting media content;

determining a scheme of the URL;

using the scheme to produce a byte stream object to handle the determined scheme associated with the URL to access parameter data;

using the byte stream object to generate a byte stream from the media content; and

using at least a portion of the byte stream to produce a media source object such that the media source object:[.]]

~~the media source object performing~~ performs format-specific parsing to produce one or more streams of data that are sent through the pipeline, and one or more media sinks ~~rendering or archiving~~ render or archive the media content;

based on the accessed parameter data, reads the media content of a given type from the location specified by the URL, and generates one or more streams of media data in a component object-based pipeline of the multimedia framework, the pipeline further comprising one or more media sinks rendering or archiving the media content.

#### REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance. In interpreting the claims, in light of the specification and the applicant's amendments and remarks filed 07/10/2009, the Examiner finds the claimed invention to be patentably distinct from the prior art

of record. The prior art does teach invoking the first object and determining whether the first object produces a second object according to a requested media content type; in an event the second object is produced according to the requested media content type, then returning the second object to the one of the plurality of applications; in an event the second object comprises a media source object, then returning the media source object to the one of the plurality of applications via a component object-based pipeline, the pipeline comprising: the media source object performing format-specific parsing to produce one or more streams of data that are sent through the pipeline, and one or more media sinks rendering or archiving the media content; and in an event the second object comprises a byte stream object and the requested media content type is a media source object or a timeline object, then invoking one or more selected byte stream handlers to generate the requested media source object, wherein the byte stream handler is selected based in part on the byte stream object, and returning the requested media source object to the one of the plurality of applications via the component object-based pipeline as recited in the claims of the present invention.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Claims 1-3, 7-12, 14-52 are allowed.

***Conclusion***

Any inquiry concerning this communication should be directed to Vivek Srivastava at telephone number 571-272-7304.
